

VOID PANELS

Non-skid surface grips
airbag and ensures
that it stays in place

Designed to withstand
50,000 lbs. of force, the
Void Panel is a terrific
longitudinal void filler

FILL VOIDS and provide **BUFFER PROTECTION** for airbags and goods

Absorbs impact by compressing then recovering. This memory feature ensures that the Void Panels stay in place to prevent load shifting. HDPE lightweight panels are easy to handle, yet exceptionally strong.

- Fill longitudinal void in a rail car
- Buffer between pallet loads of product
- Protection on each side of an airbag
- Replaces reinforced corrugate or plywood

HEAVY DUTY HDPE SOLUTION

Reduce damages
by up to **80%**

Increases product
quantity per shipment

VOID PANELS

Cargo Protect+ delivers better freight protection at a lower total cost.

FEATURES

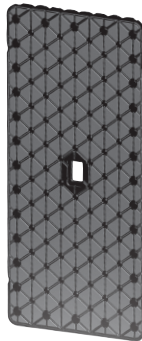

- Energy absorbing cushions without crushing
- Lightweight rigid parts enable fast loading
- Ergonomic hand holes ensure easy handling
- Splinter-free & lightweight HDPE material reduces dock related injuries
- Weather & moisture resistance allows outside storage to optimize warehouse space
- Easy to clean surfaces are beneficial for use with a variety of commodities

Ergonomic hand hole design makes parts easy to carry

SPECIFICATIONS | 4-96 Void Panel

- Passes AAR official Impact test at TTCI Pueblo Colorado
- 96"h x 48"w x 4"d – 40.6 lbs
- Can fit 264 in return shipments
- Ideal for plywood replacement
- Withstands 50,000 lbs of force

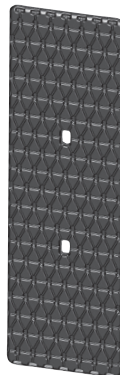

SPECIFICATIONS | 4-120 Void Panel

- 120"h x 48"w x 4"d - 49 lbs
- Can fit 220 in return shipments
- Ideal for use in boxcars
- Withstands 59,500 lbs of force

SPECIFICATIONS | 2-102 Void Panel

- 102"h x 30"w x 2"d – 23 lbs
- Can fit 480 in return shipments
- Ideal for rail cars with pallets 3-wide
- Withstands 25,000 lbs of force
