

# PLASTIC BOARDS

## STABILIZES DOUBLE STACKING, protects packaging and FILLS UNDER-HANG

**Lightweight**, extremely durable board outperforms plywood at a lower total cost.

- Use under double-stacked pallet loads to stabilize for shipment
- Use under multiple-stacked pallet loads in warehouse for safer tall stacks
- Use between pallet loads to protect product packaging
- Use to fill under-hang void on pallets
- Use instead of plywood & honeycomb corrugate

### HEAVY DUTY HDPE SOLUTION

Reduce damages  
by up to **80%**

Increases product  
quantity per shipment

# PLASTIC BOARDS

Cargo Protect+ delivers better freight protection at a lower total cost.

## FEATURES

- Energy absorbing- cushions without crushing
- Lightweight rigid parts enable fast loading
- Ergonomic hand holes ensure easy handling
