

Bulk Bag Pallet

Thermoformed HDPE
Twin Sheet Construction

01 / Details

FEATURES

- Fork entries fully enclosed to protect product
- Deck design holds product in place
- Compatible with most conveyor systems
- Lightweight for better ergonomics

OPTIONS

- Different gauges of material thickness to accommodate differing loads
- TruGrip™ highest coefficient of friction
- Stripe identification
- Coditherm
- Drain holes
- RFID

14.5 lbs weight helps load optimization

Can be used with conveyor systems

02 / Specifications

Performance characteristics vary with applications. To optimize nominal specifications, loads must be evenly distributed to reach capacity. Load construction, support conditions, transportation, load retention, user facility and temperature are factors that affect pallet capacity.

Bulk Bag Pallet

SPECIFICATIONS

PALLET ADVANTAGES

- Environmentally Friendly
- ISPM 15 Exempt
- Long Service Life

TriEnda publishes standard guidelines for its products, based on its testing standards, and, as such, these guidelines do not constitute any warranty related to each customer's individual application. The material handling industry has not standardized on test methodology and rating criteria for each individual product. All TriEnda products are sold with the understanding that the customer will validate for themselves the suitability of the product for their specific application. As each product application is unique, the customer assumes all risks associated with the determination and actual use of the pallet.
